Office Action Summary	Application No. 10/765,803	Applicant(s) WARLICK, TIM	
	Examiner Jason Benton	Art Unit 3747	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glauber et al.

The patent by Glauber et al. (5,887,566) shows an engine system that determines a minimum amount of pilot fuel needed to ignite gaseous fuel in a combustion chamber . The pilot fuel is injected into at least one of a prechamber (11) and the combustion chamber.

It is not specified how the start of the ignition location is determined, just that it is determined by a control device (20) based on operating parameters of the engine. It is the view of the examiner that to use cylinder pressure as an engine operating parameter would have been obvious in order to determine timing of the ignition.

The start of combustion location is compared to a desired start of combustion location, and the pilot fuel injection is adjusted if the start of combustion is not approximately equal to the desired start of combustion location (Col. 6, lines 29-35).

The pilot fuel is one of diesel fuel and engine oil.

Art Unit: 3747

The patent by Glauber et al. determines a desired start of combustion location.

A pilot fuel injection timing is determined.
